Farm Animal Behaviour - Stylus Publishing Bookstore It's quite gentle and is also a very intelligent animal. Its calm pace while following the herd shouldn't be interpreted as a lack of speed, as sometimes it can run very fast and even be used for racing. Moreover, it isn't an aggressive animal that would attack or bite a person. This, however, is the result of centuries of domestication.

The Arabian Camel: Characteristics, Behavior and Habitat ... • Movement of front animals draws other pigs to join and follow • Movement of animals coming behind drives front animals to continue moving forward • Animals are loosely spaced • The handler is moving with and not forcing the flow. Pigs are being given time and space to
