My 2N engine (same as the 9N) was the first engine I ever rebuilt. I took it to a machine shop to have them turn the crank, order new rings, polish the flywheel surface, and give it a valve job, but I re-assembled everything together and it was a lot of fun. I really got to know the details of the engine when I did this.

I recommend using a radiator from a 9N with a bigger tank on top, cutting two holes in it so that both water pumps from the flat head engine are operable. Get creative with the gas tank. You can either make it smaller to fit under the hood, or put it somewhere else - the fenders, behind the back seat, longways inside the hood, etc.
