Better known for audio books, Myanonamouse has a larger and friendly community with some strict rules.

Manual Transmission Will Not Go

Check your transmission fluid.

Transmission fluid lubricates the moving parts of your transmission. You should check your fluid every 30,000 to 60,000 miles in a manual transmission car.

Failure to do so can cause your transmission fluid to become contaminated with bits of metal from the bearings, synchronizers and gears.

7. Leak From the Transmission. Manual
transmission leaks can be caused by:
bad or worn-out seals or gaskets, a
damaged case or component, or even
loose bolts. To verify that a leak exists,
first, check the transmission case and oil
level. If it leaks after you just replaced
the oil, you may have put too much.
Consult your vehicle repair manual.

Electric Cars—and Irrationality—Just Might Save the Stick ...

Even if you're among the rare car buyer who prefers to drive a manual, you'll have a hard time finding one the next time you go to a dealership. Some manufacturers keep the manual around as an excuse to charge more for an automatic or CVT, but the flip side of that is it's difficult to get a well-equipped car with a manual transmission.
