The first thing we need to do is include mongoose in our project and open a connection to the test database on our locally running instance of MongoDB. // getting-started.js const mongoose = require('mongoose'); mongoose.connect ('mongodb://localhost/test', {useNewUrlParser: true}); We have a pending connection to the test database running on localhost.

Mongoose v5.10.4: Getting Started

Start mos tool. Run mos tool without arguments to start the Web UI. After start, the Web UI changes current working directory to the directory where it finishes the last time. In other words, it "remembers" its settings: the working directory, chosen port, board, etc. In this example, it is an app1 directory, a quickstart example I have done ...

Mongoose OS Documentation

Let's face it, writing MongoDB validation, casting and business logic boilerplate is a drag. That's why we wrote Mongoose. constmongoose = require('mongoose');mongoose.connect('mongodb://localhost:27017/test', {useNewUrlParser: true, useUnifiedTopology: true});constCat = mongoose.model('Cat', { name: String});constkitty = newCat({ name: 'Zildjian'});kitty.save().then(() => console.log('meow'));

Mongoose ODM v5.10.5
