Month Of Math Answers

The Problems of the Month are organized below by grade level and main topic for that level. These grade-level expectations are just estimates and should not be used as an absolute minimum expectation or maximum limitation for students. The structure of a Problem of the Month is a shallow floor and a high ceiling, so that all students can productively engage, struggle, and persevere.

Answer is: 12 . METHOD 1: List the factor pairs of 72. The factor pairs of 72 are: (1 and 72), (2 and 36), (3 and 24), (4 and 18), (6 and 12), (8 and 9).

Problem of the Month - Math Olympiads for Elementary and ...

The Problems of the Month are non-routine math problems designed to be used school-wide to promote a problem-solving theme at your school. Each problem is divided into five levels of difficulty, Level A (primary) through Level E (high school), to allow access and scaffolding for students into different aspects of the problem and to stretch students to go deeper into mathematical complexity.
