Here is an explanation from the Multilin 369 Communication manual on how the event recorder is read: The 369 event recorder data starts at address 3000h. Address 3003h is a pointer to the event of interest (1 representing the oldest event and 512 representing the latest event.

How do I access event recorder entries from the... | PI Square

I'm just confused about a line in the GE Multilin 369 installation manual. It reads: "For applications where the control power for the 369 is available from the same AC source as that of the motor, it is recommended an uninterrupted power supply be used to power up the relay, or alternatively, use a separate DC source to power up."
