Quantitative Real Time Pcr Methods

reaction. It monitors the amplification of a targeted DNA molecule during the PCR, not at its end, as in conventional PCR. Real-time PCR can be used quantitatively and semi-quantitatively. Two common methods for the detection of PCR products in real-time PCR are non-specific fluorescent dyes that intercalate with ...

Real time quantitative PCR. We have developed a novel "real time" quantitative PCR method. The method measures PCR product accumulation through a dual-labeled fluorogenic probe (i.e., TaqMan Probe). This method provides very accurate and reproducible quantitation of gene copies. Unlike other
