Healthcare executives see several barriers to value-based care success. At the top of the list is a lack of resources, including a shortage of staff and insufficient technology. ...

The Future of Value-Based Care - Managed Healthcare Executive

Future Value. The future value calculator can be used to determine future value, or FV, in financing. FV is simply what money is expected to be worth in the future. Typically, cash in a savings account or a hold in a bond purchase earns compound interest and so has a different value in the future. A good example for this kind of calculation is a savings account because the future value of it tells how much will be in the account at a given point in the future.

Future Value Calculator

It is a new value equation where $1 + 1 = 1,000$. Because in successful platforms, exponential value accretes to multiple parties, not just to platform providers. Measuring value is different in co-platforms. Beyond the usual suspects of profitability, elasticity and scalability, the measure of value delivered is in the reach of the platform.
